

Very sadly I have decided that I must give up bee keeping (for family reasons and a possible move over the winter). I have three colonies of good-tempered bees who have produced over 400 lbs of honey this year and they have plenty of stores for the winter. However, I have not managed to do a varroa treatment as yet.

The equipment I have which I also need to dispose of is listed below. Please email me alex@westonmark.co.uk or phone on 01256 862429. for further details. Any offers will be much appreciated but it would be nice to find a good home for both the bees and equipment.

Alex Turner
